Manager's Report

By Frank McDowell, CEO

The Cargill transition has come together very well by all accounts. This is attributable to Cargill's support during the software transition, New Vision's IT team putting all the software and hardware pieces back together, the support of the new employees, New Vision's grain settlement and origination employees to manage data between New Vision and Cargill and the former Cargill customers for their patience and support through the entire process. On behalf of New Vision Coop's Directors and employees, thank you for setting such a high standard through a complicated process. We are eager to proceed with pre harvest elevator repair and begin the business of the 2017 grain harvest! Again, welcome to all our new customers! Don't forget – New Vision Coop can handle your feed, agronomy and precision ag needs also!

This newsletter contains important information regarding the 2017 board election and 2017 Harvest Policies. If you know of someone that is interested in becoming a New Vision board member, the Nomination Form is included in this newsletter. Self-nomination is permitted. Harvest policy changes include a pricing date of August 24, 2018 for unpriced contracts. This was done to close these contracts within the fiscal year. Another change was the widening of freight spreads between truck and rail and feed mill locations from three cents per bushel to five cents per bushel. This is the first change since 1986 so it is long overdue.

New Vision's financials through ten months are below budget due to Cargill closing and operating cost, our grain shipment schedule and lower units and margins in agronomy. This situation is common to most cooperative managers I talk to. There are two months remaining in the fiscal year so things could change before the books close on August 31st. It is very helpful to complete grain contracts with dates of August 31st or prior and have Accounts Receivable balances paid within credit policy for the audit.

Thank you for your support and mark Monday, December 11 on your calendar for New Vision's 19th Annual Meeting.

Grain News

By Keith Newman

The 2017 Harvest is just a month away. The New Vision Coop Board of Directors continues to invest in your grain assets to improve harvest speed and convenience at two locations this year. The Jeffers project includes a flow-through, semi length, truck scale, receiving pit and 15,000 bushel per hour receiving leg and a 650,000 bushel steel bin. The new storage bin at Jeffers will allow New Vision to handle most of the Jeffers bean harvest so the remaining storage can be allocated to corn. In addition to the “big” project, two existing bins will be converted to full floor aeration in order to accommodate higher moisture corn. These Jeffers improvements will give the Jeffers location more flexibility and space to handle beans and wet and dry corn during harvest.

The Brewster location will have a new inbound and outbound scale, grain probe and scale office with an RFID reader. This project will increase the speed of inbound and outbound traffic and the grain probe will give New Vision customers more accurate samples and grades and reduce waiting time on the receiving pits. The RFID software requires your grain delivery vehicle(s) to have a small tag in the truck cab that is provided at New Vision’s expense. This tag sends a signal to our truck scale software that will automatically call up your accounts and recall your vehicle when it returns to weigh empty. You will still be responsible to identify the proper ownership and designate the account that the load applies to and the disposition of the grain. This system will reduce your time on the inbound and outbound scale plus reduce errors on tickets. This system is identical to the software at Mountain Lake, Heron Lake and Magnolia so it is tried and true. Initial set up takes a little time but is well worth it for the long run efficiency and accuracy. Again we would like to thank the New Vision Board of Directors for approving these two projects last winter. They will be a great improvement for all of you.

The Miloma, Alpha and Marna locations are new locations to New Vision Coop this fall. We look forward to operating these locations as New Vision Coop and servicing all the new customers to New Vision Coop as

well as existing customers. We also believe that the addition of the Miloma, Alpha and Marna locations will add value to New Vision Coop by giving New Vision Coop access to more grain market destinations and more flexibility in rail and truck logistics.

This newsletter contains our 2017 Harvest Policies. They were approved by the Board of Directors to be competitive and add value to all New Vision Customers. There are a few changes from the 2016 Harvest Policies. The pricing deadline for Delayed Pricing bushels has been moved up to August 24th 2018 from early October. This earlier Delayed Pricing deadline was necessary to conclude open contract accounting within the current fiscal year. The price spread between New Vision’s truck locations and the UP rail locations has been changed from 3 cents per bushel to 5 cents per bushel. This price spread has been 3 cents per bushel since 1986 and has never been adjusted to reflect the increased cost of transferring grain from the truck locations to New Vision’s rail or feed mill locations. The original freight spread structure assumed an average freight subsidy of 2 cents per bushel to transfer grain between truck and rail locations. Since 1986, the freight subsidy has grown to 5 cents per bushel due to increased freight costs over the last 31 years. After a lengthy discussion, the New Vision Board of Directors and management agreed to increase the freight spread from 3 cents to 5 cents to recognize the increased freight cost and re-align the subsidy. This adjustment will also pay customers more to haul grain direct to New Vision’s rail and feed mill locations. The goal of the grain department is to continue to provide competitive services and markets for all of our customers and generate revenue to continue to build and improve assets to better serve you. If you have any questions regarding these policies call the grain department at 507-842-2001.

Reminder: The pricing deadline for current price later contracts is October 6, 2017.

New Vision Coop would like to thank you for your continued business and hope you have a safe harvest.

Nelva Behr Retirement

When Nelva Behr started her cooperative career forty seven years ago at the Hills Coop her name was Nelva Wassenaar. Nelva's career in agriculture started on the family dairy farm located three quarters of a mile east of the Hills terminal. Nelva accepted a job in 1971 to be Assistant Bookkeeper at the Hills Coop. The office was in the feed mill where Douwina Scholten taught Nelva how to do cooperative bookkeeping. Back in the day, adding machines were state of the art. They worked great for adding and subtracting but multiplying required repeated entries of the same number to be added up in order to get the answer! Fertilizer analysis was figured by consulting a fertility chart that showed how much N, P or K to apply based on the farmer's yield.

In the late 1970s, computers were introduced to cooperative bookkeeping. These machines read a tape that contained holes coded to perform bookkeeping functions.

Nelva met Ron Behr, her husband, at the Luverne bowling alley and marriage followed in 1973. Bowling has been part of the family's recreation through 2016 when kids' and grandkids' schedules got too busy for bowling and Nelva and Ron decided to focus on grandchildren sporting events.

Nelva's retirement decision was partially influenced by the passing of her brother and sister in 2014 (life can be short), partially by centralized bookkeeping duties that occurred due to cooperative mergers and computerization and the obligation to staff the Hills terminal office.

When asked about cooperative mergers, Nelva said, "Cooperative members have two options. They can go

on as they are or join in with others to invest in better facilities that help the Coop keep up with farmers. The downside of the merger is the Coop's culture has to change with a merger to deliver efficiency."

"I look back on my years in the Hills Coop and now New Vision, and I always liked the bookkeeping work. I also recognize how bashful I was in the early days and how much fun it was to have the one-on-one customer conversations and get to know them and their families on a personal basis. It was one of the best parts of the job."

"The best advice I can give new employees is: don't be afraid to ask questions! I was very fortunate to have Douwina teach me the ropes in a very supportive manner. The other advice I would offer is be prepared for some tough times. It's not always rosy in agriculture. There's a cycle to it that you have to be prepared to work through."

"If I had one regret, it doesn't apply to work. I wish my son and daughter could have had the experience I had growing up on a family farm. It was a great experience for me to be involved in livestock and have responsibility for the young stock. I really enjoyed it. I know it's a different world today, but the kids that are able to grow up in the country are very fortunate in my opinion. It's a great life experience."

New Vision Coop's employees wish Nelva all the best in her retirement. New Vision's customers may see Nelva in the future as a part-time employee during harvest or spring season.

A retirement recognition event is being planned after harvest with details to follow. New Vision members are encouraged to attend to share their appreciation.

Agronomy News

By Dennis Weber, Agronomy Department Manager

Over the past few years I have talked a lot about the use of Nitrogen Stabilizers. Nitrogen Stabilizers should be used on any form of nitrogen that is applied to the soil. It's highly recommended to wait until the soil temperature reaches 50 degrees or less, before nitrogen is applied in the fall.

In the past, the most difficult form of nitrogen to use a stabilizer on was manure. DOW AgroSciences' Instinct II and Instinct HL were recently approved for manure stabilization when added to the manure pit during agitation. This is a much more efficient way to apply manure on your fields and receive the benefits of a nitrogen stabilizer. Review the additional information provided by DOW AgroSciences in this newsletter. It's an effective way to stabilize nitrogen nutrients.

Safety For You

By Brad Berkhof

The most rewarding time of the year for our producers and busiest time of the year for our employees will soon be upon us. You know I am talking about harvest. Safety needs to be a priority for everyone this coming harvest season. Long hours create fatigue for everyone, so please take the time to get plenty of rest, eat solid meals and plan your activities wisely. The majority of farm accidents today happen because we create the opportunity for the accident by rushing and not taking the time to think before we act. Harvest season increases the traffic on rural roads and highways with combines and grain carts moving from field to field, as well as tractors and wagons and trucks hauling grain to area elevators. To help ensure your safety, make sure to display SMV signs on equipment as well as flashing amber lights on combines and tractors. Make sure all hitch pins have safety clips and use safety chains if your equipment has them. Harvest season should be a time to be enjoyed, not a remembrance of an accident. Take the time to think of the position you're putting yourself in, whether it's crossing between wagons at the elevator, climbing under the head of the combine out in the field or rushing to get to the elevator before they close. There's always tomorrow, work wisely to make sure you get to see it!! On behalf of everyone at New Vision Coop, have a safe and bountiful harvest.

2017 Board Election

The Advisory Board has served as the contact group for members that are interested in running for the New Vision Co-op Board of Directors. If you have questions about running or serving as a director you are welcome to contact any Advisory Board member or elected director listed below.

2017 New Vision Coop Advisory Board Members

Dist 1: Peter Bakken 605-376-3640 & Dave Tofteland 920-7252.

Dist 2: Brian Penning, Chairman 370-3942, Jordan Brake 360-6768 & Keith Sieve 360-4022.

Dist 3: Troy Thompson 360-6623, Richard Cross 360-3885 & Joel Lorenz 370-5104.

Dist 4: Tim Carlblom 628-4902 & Willard Friesen 822-2429.

2017 New Vision Coop Elected Board Members (Term Expiration Year)

Dist. 1: Mark Overgaard, 283-8246 (2018).

Dist 2: Chad Wieneke 472-8597 Sec-Treas, (2018), Robert Newman 926-5220 (2019).

Dist 3: Kevin Schaefer 360-9724 (2018), Tim Hansberger, Vice Chairman 360-9089 (2019).

Dist 4: Kelly Dunkelberger, Chairman 628-4682 (2018), Danny Smith 831-5007 (2018) & Matt Gohr 507-822-0531 (2019).

Gene Metz, District 2 & Jim Eigenberg, District 3 director terms expire at the December 11, 2017 Annual Meeting. Gene and Jim have informed the Board that they will not run for re-election.

During the August 7, 2017 Board Meeting, the directors passed a resolution to eliminate the seats represented by Mr. Metz and Mr. Eigenberg in their respective districts and add one, at large board seat. The elimination of two seats plus the addition of the at-large seat will result in a nine member board of directors.

An election will be conducted at the December 11, 2017 Annual Meeting for the at-large director seat. If you are interested in becoming a candidate for the New Vision Coop Board of directors you must meet the qualifications, complete and return a copy of the New Vision Coop Nomination Form by September 15, 2017 to any Advisory Board member or Chad Wieneke, Sec-Treas., % New Vision Coop, 38438 210th Street, Brewster, MN 56119.

New Vision Co-op Director Qualifications

Be a member of New Vision Co-op: Must be a producer of agricultural products and patronize the Cooperative by doing a minimum of \$10,000.00 of business during the fiscal year ending August 31, 2017.

Be less than 70 years old on December 11, 2017.

Nominating Procedure

New Vision Co-op members may contact any Advisory Board member or complete nomination papers that are available by calling the Brewster office (842-2001) or visiting the New Vision website (newvision.coop). The Board Members review nominations and approve candidates. **Nomination papers must be received by September 15, 2017 to be considered as a candidate for the 2017 election.**

2017 NEW VISION COOP HARVEST POLICIES

(Effective September 1, 2017)

ALL PROGRAMS AND POLICIES ARE SUBJECT TO CHANGE WITHOUT NOTICE

No early delivery of grain contracts: Grain originally contracted for November or later delivery cannot be delivered early. Early deliveries of contracted grain will be priced out on the day of delivery and the original contract will remain in place.

Grain Application at the scale: Our new grain software requires that grain disposition is entered correctly, at the scale when grain is delivered. **All drivers delivering grain will need to know the following information: Grain owner(s), grain share splits, grain disposition (Cash, Warehouse Storage, Feed Bank, Delayed Price Agreement).**

Deferred Payment Contracts will be available for both corn and soybeans. Grain committed to deferred payment cannot be changed. Verbal deferred payment instructions are also irrevocable.

Grain will be priced based on its actual delivery point on the date of sale.

Feed Bank Program

Corn deliveries for Feed Bank are limited to Worthington, Windom, Magnolia and New Vision shuttle loading locations at Brewster, Hills, Heron Lake, Miloma and Mountain Lake. The first 60 days of feed bank stored grain will be free. If feed bank grain is stored beyond 60 days, storage charges will be invoiced at \$.04 per bushel per month based on the month end balance. Off grade corn containing high Damage and high Foreign Material cannot be deposited into Feed Bank account. Feed bank grain not processed for feed will be subject to regular storage charges and a \$.25 per bushel penalty.

On Farm pick-up will be available on corn and soybeans on a first come-first served basis with priority given to New Vision satellite locations. Contact Keith at Brewster (842-2019) for additional information.

STORAGE

No minimum charge! The storage rate will be \$.04 per bushel per month with charges calculated on a daily basis. Storage space will be available for corn and soybeans on a first come-first served basis. Storage space will depend on pre-harvest inventory, car supply, crop size, and soybean purchases during harvest. **All grain that is sold out of Storage, DPA, or Warehouse Receipts will be sold on the spot cash market ONLY. Stored grain cannot be applied to Forward Contracts.**

DELAYED PRICE Programs - A reminder to producers, DPA contracts are not eligible for CCC loans or LDP programs.

SOYBEANS

The service fee will be \$.035 per bushel per month with charges calculated on a daily basis. A **\$.21 per bushel maximum service fee of will apply.** DPA soybeans must be priced by Friday, August 24, 2018. DPA soybeans not priced by Friday, August 24, 2018 will be priced automatically and without notice at noon on Monday, August 27, 2018.

DELAYED PRICE Programs - A reminder to producers, DPA contracts are not eligible for CCC loans or LDP programs.

CORN

The service fee will be \$.035 per bushel per month with charges calculated on a daily basis. A **\$.21 per bushel maximum service fee of will apply.** DPA corn must be priced by Friday, August 24, 2018. DPA corn not priced by Friday, August 24, 2018 will be priced automatically and without notice at noon on Monday August 27, 2018.

2017 Crop DPA Cash Advance Program

New Vision Coop will offer a DPA contract with a cash advance for 2017 crop corn and soybeans for a limited number of bushels. These terms are applicable to both corn and soybeans committed to this contract:

1. **Title Transfer & Loan Eligibility.** Title transfers to New Vision Coop upon delivery. DPA contracted grain is not eligible for CCC loans or LDP programs.
2. **Delivery Conversion Options.** Corn or beans that originally delivered to New Vision elevators on Open Store or DPA may be converted to the DPA Cash Advance Program. Accrued service fees and drying charges are due prior to issuing an advance if bushels are converted to the DPA Cash Advance Program.
3. **Cash Advance.** Cash advance can be taken at any time prior February 1, 2018.
4. **Market Risk.** Producer is liable for any price difference if the market for DPA contracted grain is sold for less than the advance, plus accrued service charges and any other discounts or fees that may apply.
5. **Pricing. DPA Cash Advance** grain must be priced by Thursday, August 23, 2018. DPA Cash Advance Program grain not priced by Thursday, August 23, 2018 will be priced automatically and without notice at noon on Friday, August 24, 2018.
6. No minimum service fee applies.
7. **All terms are subject to change at any time. Quantities for this program are limited.**

Additional terms and conditions:

Corn.

Corn will be shrunk to 14.0% moisture.

Drying charges will be paid prior to receiving an advance.

Advance rate will be \$ 2.00 per bushel.

Service charges will be 4 cents per bushel per month charged on a daily basis.

Beans

Beans will be shrunk to 13.0% moisture.

Advance rate will be \$ 5.25 per bushel.

Service charges will be 5 cents per bushel per month charged on a daily basis.

2017 Crop Basis Fix Contract with a Cash Advance Program

New Vision Coop will offer a Basis Fix Contract with a cash advance for 2017 crop corn and soybeans for a limited number of bushels. These terms are applicable to both corn and soybeans committed to this contract:

1. **Title Transfer & Loan Eligibility.** Title transfers to New Vision Coop upon delivery. Basis fix contracted grain is **not** eligible for CCC loans or LDP programs.
2. **Delivery Conversion Options.** Corn or beans that originally delivered to New Vision elevators on Open Store or DPA may be converted to the Basis Fix Contract with Cash Advance Program. Accrued service fees and drying charges are due prior to issuing an advance if bushels are converted to the Basis Fix Contract with Cash Advance Program. Original shrink and drying charges and accrued service fees will not be adjusted.
3. **Cash Advance.** Cash advance can be taken at any time prior to the final pricing of Basis Fix Contract.
4. **Market Risk.** If the futures price less the contracted basis is within \$.10/bushel of the advance paid, the contract will be automatically priced and settlement made to the producer.
5. **Pricing.** Basis Fix Contracts must be priced or rolled prior to the Friday before First Notice Day of the CBOT futures month assigned to the Basis Fix contract. Rolling Basis Fix Contracts will be limited to the September futures of the following crop year. Basis Fix Contract value will change to reflect the CBOT exchange spread at that time the contract is rolled.
6. If Basis Fix Contracts are rolled a service fee will apply
7. **All terms are subject to change at any time. Quantities for this program are limited.**

Additional terms and conditions:

Corn

Corn will be shrunk to 15.0% moisture.
Drying charges will be paid prior to receiving an advance.
Advance rate will be 70% of the current cash bid.

Beans

Beans will be shrunk to 13.0% moisture.
Advance rate will be 70% of the current cash bid.

Grain Grade and Moisture Standards

CORN. 2017 crop, Test Weight, Damage, and Foreign Material will be averaged by delivery period. New Vision corn bids are based on #2 yellow corn grade factors and settled at market discounts on the date of sale, except moisture. Loads above 4.0% Foreign Material and 10.0% Damage will be settled individually and not be included in grade averages.

Harvest Moisture Discounts: 1.4% shrink and a drying charge of .03 per bushel for each point of moisture removed. Loads up to 16.0% moisture will be averaged for Cash and Contracts only, provided the overall average moisture is 15% or less.

Cash and Contract corn will be shrunk to 15.0%

Storage, Feed Bank and Delayed Price Agreement Contracts will be shrunk to 14.0%

SOYBEANS. 2017 crop, Test Weight and Damage will be averaged by delivery period. New Vision soybean bids are based on #1 Yellow Soybean grade factors and settled at market discounts on the date of sale. Bushels will be deducted from individual loads with Foreign Material over 1.0%

Harvest Moisture Discounts: 1.0% shrink for each 0.5% of moisture over 13.0% to 15.0%, 1.5% shrink for each .5% over 15.0%. Soybeans over 17.0% moisture may be rejected. Loads with moisture 14.0% and below will be averaged by delivery period. Soybeans will be shrunk to 13.0%, Cash, Storage, and DPA.

Worthington, Windom, and Magnolia Feed Corn Deliveries

This corn must be of top quality to satisfy the requirements for the rations of our feed customers. Corn not suitable for feed processing will be assessed actual freight transfer expense to our nearest shuttle location.

Summary of 2017 Harvest Policies

Unchanged from 2016 Harvest Policies: Corn and bean drying charges, averaging policy & Maximum DPA fee. Contracting Options and conversion options: Cash Advance Delayed Price Program, that allows the flexibility to roll from the conventional, no advance DPA to the Cash Advance DPA contract and assume the terms of the cash advance DPA. Basis Fix Contract with a cash advance that allows the flexibility to roll from open store or DPA to a Basis Fix Contract with a cash advance.

New for 2017 Harvest Policies: The final pricing date for Delayed Pricing Bushels was changed to August 24th 2018. This was done to accommodate fiscal year-end accounting.

IMPORTANT. Freight spreads between truck locations and shuttle elevators will be increased from three cents per bushel to five cents per bushel effective September 1, 2017. This change was necessary to reflect increased transfer freight costs. This is the first adjustment since the freight spread was established in 1986.

TEST YOUR MANURE

Collecting manure samples for nutrient analysis should be considered the foundation of your nutrient management plan to ensure that overapplication of nutrients is not occurring and at the same time you are not underapplying a given nutrient if samples are lower than anticipated. Manure sample analysis should be taken just prior to application for the most accurate analysis to give you the ability to adjust application rates accordingly to meet your nutrient plans.

NUTRIENT ANALYSIS

At a minimum, analyze all manure samples for total nitrogen (N), total phosphorus (P), total potassium (K) and moisture content (or dry matter). It's recommended that samples are analyzed for ammonium N, as well nitrate N. Nitrate nitrogen is the form most susceptible to loss through leaching or denitrification.

BEST MANAGEMENT PRACTICES FOR STABILIZED MANURE

Best management practices include a wide range of proven methods for getting the most from your livestock manure, such as:

- Setting realistic yield goals for each field
- Using soil tests to develop a balanced fertilizer program
- Selecting proper hybrids and plant populations to attain the established yield goals
- Developing an N fertilizer program to fit hybrid and yield goals
- Using Instinct® nitrogen stabilizer to protect N below ground

INSTINCT® NITROGEN STABILIZER WITH MANURE RECOMMENDED USE RATES PER ACRE

| | Instinct® II | Instinct® HL |
|--|--------------|--------------|
| When applied before Oct. 1 and/or soil temperature above 60 F. | 74 oz./A | 48 oz./A |
| When applied before Nov. 1 and/or soil temperature above 50 F to 60 F. | 56 oz./A | 36 oz./A |
| When applied after Nov. 1 and/or soil temperature below 50 F, and spring applications. | 37 oz./A | 24 oz./A |

BEST PRACTICES FOR THE BLENDING OF INSTINCT IN PITS AND LAGOONS*

- Calculate the number of acres the manure pit/lagoon could potentially treat to ensure you are blending the correct amount of Instinct on a per-acre basis to incorporate into the deep pit/lagoon. Remember, the slurry remaining in the bottom needs to be included in the calculation for potential acres.

RATE CALCULATION FOR LIQUID MANURE

| | | | |
|--|--|--------------------------|------------------------------------|
| ÷ | X | ÷ | = |
| Number of gallons in deep pit/lagoon | Number of gallons of manure applied per acre | Use rate of Instinct® | Gallons of Instinct required |
| 128 | 128 oz./gal. mix | 128 | 128 |

- The level of agitation for an even distribution of Instinct is no more than needed to get the outdoor pit/lagoon thoroughly mixed for a normal application.
- Once Instinct has been added to the manure pit/lagoon and agitated for application, it is recommended that applications begin as soon as possible.
- If applications are delayed for more than seven days, re-agitation is recommended to ensure uniformity of Instinct throughout the outdoor manure pit/lagoon.

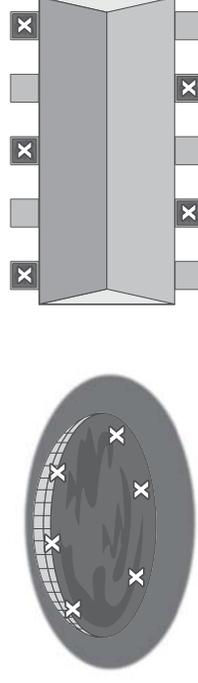

*As always when agitating manure pits, follow the recommended safety steps to protect yourself and your animals from manure components that might be emitted upon agitation.

UNIFORMITY OF INSTINCT IN PITS

Dow AgroSciences trials show that Instinct® nitrogen stabilizer is successfully distributed throughout the pit with relatively even distribution when agitated under common agitation procedures.

RECOMMENDED APPLICATION AREAS

Instinct should **ONLY** be poured outside of the building into the pump-outs where allowed. Pour Instinct into multiple pump-out locations around the building or lagoon to help aid in distributing Instinct throughout the slurry. Instinct should not be poured through the slats or flooring inside the building.

New Vision Coop Director Nomination Form

Due by September 15, 2017

An at-large director seat election to be conducted in conjunction with the December 11, 2017 Annual Meeting.

Any New Vision Coop member is eligible to nominate any member, including a self-nomination, to be a candidate for the New Vision Coop Board of Directors. Nominees must complete this Nomination Form and forward it to any Nominating Committee member or Chad Wieneke, New Vision Coop Board Secretary-Treasurer, for consideration by September 15, 2017. The New Vision Coop Advisory Board serves as the Nominating Committee. The Nominating Committee shall review applications and submit nominees to the New Vision Coop Board of Directors for approval. The New Vision Coop Board of Directors shall review the nominees submitted by the Nominating Committee and determine which, if any, nominees shall be placed on the ballot as candidates for election to the Board of Directors. Candidates may be required to participate in an interview. The election is conducted by mail-in ballot sent to the membership a minimum of two weeks prior to the annual meeting held on December 11, 2017. Properly executed ballots are counted and results reported during the December 11, 2017 Annual Meeting.

New Vision member making this nomination (can be the nominee):

_____ ph. no. _____

Full name of person nominated to serve as a New Vision Coop director (the Nominee):

Has the nominee agreed to place his/her name for consideration?

_____ Yes _____ No

Has the nominee agreed to provide the Nominating committee with all information required to conduct an evaluation? _____ Yes _____ No

Nominee's contact information:

Mailing Address: _____

Telephone: (507) _____ Cell Ph. _____

E mail address: _____ District #: _____ (Residence)

County, Township & Section of residence: _____

Return completed form to: Any Advisory Board member or
Chad Wieneke, Secretary-Treasurer
